Professional Summary

Software Engineer with **5** years of experience in React JS and Node JS, skilled in headless CMS platforms like AEM Headless, Contentstack, and Sanity.io, building scalable and high-performance applications.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, SQL

Technologies: React JS, Micro frontends, Jest, Next JS, Node JS, Express JS, REST, GraphQL, Contentstack, Sanity.io, AEM headless, Apollo Client, TanStack Query (React Query), TanStack Eco system, Zustand, Redux, Tailwind CSS

Tools: Postman, PGAdmin 4, GIT Lab, GIT Hub, Tekton, GIT Lab CI/CD, JIRA, AEM, Adobe Analytics

Databases: PostgreSQL, MySQL

Cloud Services: AWS Lambda, AWS S3, Cloud watch, GCP

Experience

Senior Software Engineer, Epam Systems – Chennai Dec 2025 – Present

- Rebuilt **3** existing pages from Vanilla JavaScript to React JS and Tailwind CSS enabling better component reuse and cleaner architecture.
- Developed a high-performance marketing application using Next.js, leveraging **SSR** (Server-Side Rendering) and **SSG** (Static Site Generation) to improve page load speed and SEO.
- Integrated headless CMS platforms like **Contentstack** and **Sanity.io** to enable dynamic content management, allowing non-technical teams to update content without developer involvement.

Engineer - Product and Platform Engineering, Altimetrik – Chennai Nov 2023 – Dec 2025

- Developed **3** full-stack web applications for insurance products (FinTech) from scratch within **6** months, implementing core functionalities such as customer information collection, insurance quote creation, loss claim processing, and marketing pages that streamline the end-to-end insurance workflow.
- Converted the insurance marketing pages from Client-Side Rendering to Next.js **SSG/SSR** using the App Router to achieve **SEO**-friendly rendering, reduce initial load time, and enhance ARIA and semantic HTML standards resulting in a **15–20** point improvement in accessibility score.
- Developed multiple React-based UIs integrated with Adobe Experience Manager (**AEM**) as the CMS. Created and managed editable and static templates, Ensured high application reliability and reduced production bugs by maintaining over **90%** test coverage for React components with **Jest**.
- Developed **3** microservices to handle insurance quote creation, updates, and run-rate validation, integrating with insurance domain systems to verify customer eligibility and status while maintaining over **90%** unit and integration test coverage.
- Migrated **2** microservices from Java to **Express.js** to handle customer record verification and integrate with multiple third-party services, resulting in an average response-time reduction of approximately **500 ms**.

Software Engineer, Avasoft – Chennai Feb 2021 – Nov 2023

- Migrated **12**-years-old Java Monolithic Ecommerce application into web application using React MFE as a frontend and Node JS as a backend and Postgres as a database in **18** months.
- Created multiple micro frontend applications from scratch, such as agreement, inventory and dashboard each consisting of almost **5** pages of React UI.
- Enhanced application performance by over **30%** through the implementation of lazy loading, code splitting, and memoization techniques.

- Developed **20+** Node.js microservices for an inventory management module, handling **2 million** inventory records daily and integrating with three different databases for pricing, inventory management, and user configuration.
- Reduced microservice response time from **3 seconds** to **400ms** by optimizing database performance through query tuning, indexing strategies, and caching mechanisms.

Apprenticeship, Ashok Leyland – Hosur

Apr 2019 – Mar 2020

- Worked as an Industrial Safety Executive, managing industrial safety practices and conducting safety audits within the manufacturing plant.

Projects

React Microfront end generator - NPM Package

[Live](#) | [GitHub](#)

- Developed and published an NPM package **react-mfe-gen**, a **CLI** tool that automates scaffolding of base setups for React Micro-Frontend (MFE) architecture, enabling faster and standardized project initialization.
- Executed via the **create-react-mfe** command in terminal, the tool interactively collects user preferences and automatically generates a preconfigured React application structure.
- Technologies Used: Node JS, TypeScript, NPM

Receipe Finder - Next JS

[Live](#) | [GitHub](#)

- Developed a recipe finder application using **Next.js** with file-based routing, enabling users to easily discover recipes based on meal types and dietary preferences (breakfast, lunch, dinner, veg, non-veg), implemented shared layouts and dedicated loading/not-found pages for a consistent user experience across the app.
- Technologies Used: Next JS, HTML, Tailwind CSS

Certifications

Graph Developer - Associate (Apollo Graph QL)

[Link](#)

Knowledge of GraphQL and the Apollo tool suite to design a schema, run an Apollo Server 4, and perform queries with Apollo Client 3 on the frontend.

Contentstack Developer - (Contentstack)

[Link](#)

Certified Contentstack Developer with hands-on experience in building scalable headless CMS-driven applications using React/Next.js.

Sanity certified content operator - (Sanity)

[Link](#)

Demonstrated expertise in Sanity Studio content operations including structured content modeling, GROQ queries, publishing workflows, media asset management, and SEO optimization

Generative AI for Everyone - (Deep Learning.AI)

[Link](#)

What generative AI is and how it works, its common use cases, potential opportunities and risks that generative AI technologies present to individuals, businesses, and society, How to think through the life cycle of a generative AI project, from conception to launch, including how to build effective prompts.

Next.js Developer - (Coursera)

[Link](#)

Gained hands-on knowledge of Static Site Generation (SSG) and Server-Side Rendering (SSR), along with implementing file-based routing, creating layouts, and applying consistent layouts across pages.

Education

Kongu Engineering College, Erode

Sept 2015 – May 2018

Bachelor of Engineering (B.E) in Mechatronics Engineering

JACSI Polytechnic College, Tuticorin

Sept 2013 – May 2015

Diploma in Mechanical Engineering
